4. Annual meeting of the American Society for Testing Materials.

Vol. 74. No. 2. July 8, 1915.

1. Electric hoist of the Hamilton Inclined Railway.
2. Eliminating the Tower-Grove grade crossing at St. Louis.
3. Hydrostatic catenary flume on a reinforced concrete aqueduct.
4. Long-span continuous-truss bridge over Ohio River at Sciotosville.
5. Deep bridge piers sunk without air.

Vol. 74. No. 3. July 15, 1915.

1. Design of shore-protection works.
2. Two large irrigation projects in Russia. II.
3. Rebuilding the Muskingum Bridge near Coshocton.
4. Track depression at Mattoon; Illinois Central R. R.
5. Activated-sludge tests at Milwaukee, Wis.

Vol. 74. No. 4. July 22, 1915.

1. Stepped concrete river wall at Harrisburg.
2. Tests of frictional resistance of concrete on shale.
3. Transmission line towers: Foundations and erection.
4. Activated sludge in America: An editorial survey.

Vol. 74. No. 5. July 29, 1915.

1. Chicago municipal pier.
2. New features in surveying instruments.
3. Log-handling equipment at Arrowrock Dam.
4. Hydraulic redevelopment at Turners Falls, Mass.
5. Designing a steel dome.
6. Brooklyn sewage-aeration and activated-sludge experiments.
7. Ohio River Bridge for the C. B. & Q. R. R.

1952

Vol. 74. No. 6. Aug. 5, 1915.

1. Road-maintenance costkeeping in Pennsylvania.
2. Large coaling stations on the Panama Canal.
3. Ninth street pier in Lake Erie at Cleveland, Ohio.

Vol. 74. No. 7. Aug. 12, 1915.

1. Concreting plant for large Chicago warehouse.
2. Automatic sewage-pumping and metering station.
3. Cutting a city street through a railway station.
4. Stripping water-works reservoirs.
5. Superstructure of Chicago municipal pier.
6. Maintaining concrete and brick roads in Illinois.
7. Flood at Erie, Pennsylvania, due to a great rainstorm.

Vol. 74. No. 8. Aug. 19, 1915.

1. Rebuilding the Omaha water-intake cribs.
2. Automatic block signals for single-track railways.
3. Coast erosion and protection on Long Island and New Jersey. I.—Littoral drift.

ENGINEERING RECORD

Vol. 71. No. 24. June 12, 1915.

1. The economic side of sand testing.
2. River improvement for public health reclaims 10,000 acres of fertile land.
3. Point defiance line eliminates last heavy grade between Tacoma and Portland.
4. Floor design of the New Massachusetts Technology Buildings based upon beam tests.

Vol. 71. No. 25. June 19, 1915.

1. Alaska's road and bridge builders face snow, frozen ground and glacial floods.

- 2. Safe concrete demands knowledge of nature of sands.
- 3. Longest municipal pier in United States is nearing completion in Chicago.

Vol. 71. No. 26. June 26, 1915.

- 1. One huge single-lift lock at Louisville will guard the entrance to the Portland Canal.
- 2. New Ohio River Bridge to contain longest riveted-truss spans in America.
- 3. Quality of concrete controlled by tests by sand.
- 4. Monographic charts simplify solution of problems in structural design.
- 5. Monographic charts for simple beam design.

Vol. 72. No. 1. July 3, 1915.

- 1. Operating records of Atlanta Sewage Treatment Plant show adequate degree of purification.
- 2. Committee on concrete tests outlines work in progress.
- 3. New methods of odor elimination at garbage plants indicated by New York tests.
- 4. Special pier and floor design feature Pacific Highway Interstate Bridge.

Vol. 72. No. 2. July 10, 1915.

- 1. Why drainage of irrigated lands is necessary, and how the problem is handled.
- 2. Flat-slab bridges at Denver combine permanency and good appearance.
- 3. Tunkhannock Viaduct nearing completion.
- 4. Driving and lining carried on simultaneously at Snoqualmie tunnel saved timbering.
- 5. Garbage collection studies in Chicago justify continued use of horses.
- 6. Longest simple truss span in world to be erected over Ohio River at Metropolis.

Vol. 72. No. 3. July 17, 1915.

- 1. Earth pressure determined by laboratory apparatus.

1954

2. Typical and special construction used on Queens extension to New York Elevated.
3. Handling hydraulic fill on Piute Dam.
4. Longest riveted simple trusses erected around old bridge by cantilever method.

Vol. 72. No. 4. July 24, 1915.

1. New methods evolved in building world's largest bridge.
2. Steel shields protect traffic during removal of New York Subway roof.

Vol. 72. No. 5. July 31, 1915.

1. Operation analysis of new machines which cheapen the moving of earth on road work.
2. Beat scheduled time five months in building huge De la Brea sewer.
3. 200,000 yards of concrete placed for \$ 800,000 in Lake Washington Canal Lock.

Vol. 72. No. 6. Aug. 7, 1915.

1. Swedish Government builds hydro-electric plant above the Arctic Circle.
Part 1.
2. Solar declinations computed by graphic method.
3. Concrete cribs used successfully in dock construction at Victoria.

Vol. 72. No. 7. Aug. 14, 1915.

1. Restricted stream channel responsible for Erie flood damage.
2. How oiled earth roads are built in Kansas.
3. Swedish Government builds hydro-electric plant above the Arctic Circle.
Part 2.
4. Direct-lift span provides 55-foot clearance over Louisville and Portland Canal.

JOURNAL OF THE AMERICAN WATER WORKS ASSOCIATION

Vol. 2. No. 2. June, 1915.

1. Minutes of Proceedings Thirty-fifth Annual Convention American Water

1955

Works Association.

2. Studies of artesian waters in Chicago and surrounding territory.
3. The application of the theories of public regulation to the management of utilities.
4. The choice of alloys for water works design.
5. Cooled drinking water.
6. Treatment of water for locomotive use.
7. The new filtration plant at Quincy, Illinois.

JOURNAL OF THE WESTERN SOCIETY OF ENGINEERS

Vol. XX. No. 6. June, 1915.

1. The Bingham and Garfield Railway—a short road in Utah with some unusual features.
2. Pressures on piles supporting masonry.

Vol. CXIX. No. 3104. June 25, 1915. *THE ENGINEER* (London)

1. British portland cement-making machinery. No. XVI. 1020. 10/7

Vol. CXX. No. 3105. July 2, 1915. *THE ENGINEER* (London)

1. British portland cement-making machinery. No. XVII. 1020. 10/7
2. A reinforced brickwork retaining wall. 10/7
3. Coal loading plant at Workington Harbour. 10/7
4. The testing of building stone in Canada. 10/7

Vol. CXX. No. 3106. July 9, 1915.

1. Economy in the design of reinforced concrete columns. No. I. 10/7
2. British portland cement-making machinery. No. XVIII. 10/7

Vol. CXX. No. 3107. July 16, 1915. *THE ENGINEER* (London)

1. Economy in the design of reinforced concrete columns. No. II. 10/7

THE ENGINEERING MAGAZINE (London)

1961

Vol. XLIX. No. 4. July, 1915.

1. Rock drills in mining.
2. Improved rail section.
3. The Panama crane failure.

THE INDIAN AND EASTERN ENGINEER

Vol. XXXVI. No. 6. June, 1915.

1. On impact coefficients for railway girders.
2. The New British Standard Specification for Portland Cement.

THE RAILWAY ENGINEER

Vol. XXXVI. No. 425. June, 1915.

1. Automatic train control. (I).
2. Wind pressures.
3. The distant signal and 3-position signalling. (II).
4. Modern locomotive engine design and construction. (III).
5. A review of the art of signalling and some suggestions.

Vol. XXXVI. No. 426. July, 1915.

1. Electrical system of cab-signalling. II. (Concluded from page 173.)
2. Automatic train control. II. (Continued from page 151.)
3. Stress distribution in materials.
4. Concrete arches without reinforcement. (Reinforced concrete in railway work. XXI.)

THE RAILWAY MAGAZINE

Vol. XXXVII. No. 217. July, 1915.

1. British locomotive practice and performance.
2. Railway electrical progress and practice.

Vol. XXXVII. No. 218. Aug., 1915.

1. Jubilee of the Highland Railway.

1962

2. Progress of the Great Western Railway from Oxford to the Mersey.

No. III.

WATER AND WATER ENGINEERING

Vol. XVII. No. 198. June 15, 1915.

1. Birkenhead water supply.
2. Corrosion of iron and steel.
3. The stability of quay walls on earth foundations.

Vol. XVII. No. 199. July 15, 1915.

1. Water purification by liquid chlorine.
2. Ashton-under Lyne, Stalybridge and Dukinfield (District) Waterworks.
3. The effect of springs upon water levels in the chalk of Eastern Surrey.
4. Hydro-geological conditions at Newbald, East Yorkshire.

ZEITSCHRIFT FÜR BAUWESEN

64. Jahrgang. 10 bis 12 Heft. 1914.

1. Bauanlagen für die Herstellung der elektrischen Zugförderung auf den Eisenbahnlinien Magdeburg-Bitterfeld-Leipzig-Halle, mit 22 Textabbildungen und Blatt 45 bis 49 im Atlas. (Schluss)
2. Erweiterung des Emder Hafens, mit 6 Textabbildungen und Blatt 60 bis 63 im Atlas. (Fortsetzung statt Schluss.)
3. Die Grundlagen der Wasserbewegung in unseren Flüssen, mit 6 Textabbildungen.
