# SYNOPSIS

The Japan Society of Civil Engineers (JSCE) formed the Steel Fiber Reinforced Concrete Research Subcommittee of the Concrete Committee when it was entrusted to research steel fiber reinforced concrete by the Kozai Club.

The recommendation for design and construction of steel fiber reinforced concrete was drawn up in 1983 by the research subcommittee on the basis of the results of research and actual applications in construction work. The recommendation includes guidelines on steel fiber reinforced shotcrete, quality specifications of steel fiber, and the method of tests for steel fiber reinforced concrete.

Masatane KOKUBU  
(Chairman)

Kazusuke KOBAYASHI  
(Secretary)

---

Masatane KOKUBU is professor emeritus of the University of Tokyo. He was chairman of the Committee on Concrete in Japan Society of Civil Engineers from 1960 to 1982. He is honorary member of the Japan Society of Civil Engineers and of the American Concrete Institute. He is member of Executive Committee of I.A.B.S.E.

---

Kazusuke KOBAYASHI is professor of civil engineering at Institute of Industrial Science, University of Tokyo. He is member and secretary of the Subcommittee on Steel Fiber Reinforced Concrete.
